

High quality bandsaw blades

Premium
Quality

High
Performance

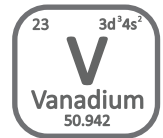

Increased
Durability

For every type
of wood

Increased
Tenacity

High
Elasticity

MetPlatinum are high quality bandsaw blades designed for endurance cuts.

- Good **Durability** due to it's high content of Chromium, which ensures increased resistance to overheating
- High **Tenacity**
- Due to the low Carbon content, the hardenability decreases, which gives a **higher resistance to cracking**, both in cutting and in the sharpening process
- High elasticity that gives it **resistance to vibration and increased weariness**
