

Performance cutting for high demands

**premium
quality**

**high
performance**

**increased
durability**

**for every types
of wood**

increased tenacity

Superior-quality bandsaw blades for high-quality cutting of logs in sawmill conditions.

- ensures a high productivity
- very high durability (longer cutting time between two sharpenings)
- high resistance (due to it's high content of Ni, it has a higher resistance for repetitive bonding on the flywheel without cracking)
- the bandsaw blade keeps well it's tensioning during the cutting
- lower sensibility to the technical condition of the sawing machine
